

PLSN

PROJECTION, LIGHTS & STAGING NEWS

Web offset. SWOP standards apply. CMYK, 4-color process printing only. For PMS ink color availability contact your account manager.

All ads must be submitted in digital format. Preferred file format: CMYK or Grayscale, high resolution (300dpi or greater) Photoshop-compatible EPS, TIFF, JPEG or PDF files. If supplying layered files, all support images and fonts must be included, with all fonts converted to outlines.

Other acceptable file formats are: Mac-compatible InDesign CS3 or Illustrator .EPS files, collected with all working files and Postscript fonts (screen and printer) included. Publisher is not liable for inferior outcome if guidelines are not followed.

For color critical ads, two digital color proofs must be provided, created from the supplied digital file on a contract-quality, digital halftone proofing system in accordance with SWOP standards (Imation Digital Matchprint, Kodak Approval, Iris, Rainbow, etc.)

Laser or inkjet proofs are not considered accurate in color and will be used as content confirmation only. Publisher is not liable for color inaccuracy if guidelines are not followed and color proofs not supplied.

For bleed fractional ads, use the non-bleed dimensions as your live area. Do not allow any essential type or art to fall outside this area. For spread ads, do not place any essential type or images across the gutter (center line) without adding .125" space on each side of the fold for safety (total .25").

Materials not provided to the above specs will be altered by the publisher. Advertiser will be invoiced for necessary alterations for technical reasons and for any requested design changes.

If you have questions or concerns regarding ad or insert specifications, please contact the production manager at 702.932.5585. For ad sales information, please contact your account manager.

Preferred method of ad file delivery—please upload self-extracting compressed digital files to: www.fohonline.com/upload (100 MB max)
