LONDON - XL Events, working with Premier PR, specified and supplied Pixled FX-11 LED for the world premiere of the film adaptation of Les Miserables. The event was held outdoors at Leicester Square, requiring a weather proof product, which XL Events supplied with Pixled's FX-11 tiles.

More details from XL Events ( http://www.xlvideo.tv ):

LONDON - XL Events, working with Premier PR, specified and supplied Pixled FX-11 LED for the world premiere of the film adaptation of Les Miserables.

Following XL's work on the Total Recall premiere earlier this year, Premier PR once again called upon XL Events' technical expertise to provide a suitable outdoor LED solution for the event in London's Leicester Square.

In addition to the requirement for a 'weather-proof' product, the event needed LED which allowed access through the LED tiles for rigging of the lightbox letters forming the glowing Les Miserables logo.

XL Events supplied 60 tiles of Pixled's lightweight FX-11 to fill the rear upright of the stage where the stars were interviewed before the film screening.

The FX-11's easy maintenance allowed removal of the rear shutters and allowed the letters to be attached through the tile.

Mark Rooney, project manager for XL Events comments, "It was great to work with Premier PR again, and we enjoy the challenge of finding the right video product to enable them to realize
